Art Unit: 3753

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 9-11 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Houston '758.

Houston shows a rotary valve with seals formed of a pair of grooves on each side of flow channel formed by plates 188, 190 which receive purge gas through 382, 384, 388, 390, see Figure 8, the fluid seal extending on the axial ends of the plug as well.

Claims 7-8 and 12-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
